Mr. Gillette claimed to have patented a machine for imitating the sound of a horse's hoofs on a stone payment, but he failed to reclude its hoofs on a stone pavement, but he falled to produce in court his specifications from the Patent Office, or any proof that a patent had been obtained. Mr. Atwell said proof that a patent has been suspensively that his effect in "His Lordship" was produced with an ordinary paving stone half covered with fine sand. A man pounds on this stone with hollow blocks of wood, upon the bottom of which is fastened an ordinary iron horseshoe. By this means he imitates as near as possible the various states of a bosse.

THE SCHOOLHOUSE MUST BE IMPROVED, BUT THE A Magnzine Article timt is Attracting Much Attention

What the Late Dr. Willard Parker Said. The well-known Dr. Titus M. Coan has just contributed an article to the October number of Harper's Magazine, entitled "Home Use of Mineral Waters." Dr. Coan has entitled "Home Use of Mineral waters. Dr. Coan has made a special study of this subject for years, and is undeubtedly eminently prepared to write upon the subject in a wholly able and disinterested manner, or the Harpers never would have employed him to do so. He treats the question in a clear and exhaustive manner, and shows the unquestionable aid to health which mineral waters exert closing his article Dr. Coan says:

closing his article Dr. Coan says:

"The Waters of Vichy are of much use in diabetes; so, too, are some of the domestic calcie waters, as the Bethesda water, which is closely allied in its composition to the alkaline group. This excellent water is very effective in the treatement of diabetes. It is carbonated artificially and makes an agreeable as well as a medicinal beverage.
'Buy a barrel of Bethesda,' said the late Dr. Willard Complaint was recenly made to the Board of Parker to a diabetic patient, and drink all you want of it. also valuable in checking the progress of albuminaria

(Bright's disease)."
Medical authority like this is especially valuable, because it is wholly disinterested. It proves, conclusively, that not only is B-thosda water the most paratable and agreeable of drinking and table waters, but that it has no equal for all kidney, liver, or biadder diseases, as its wonderfully increasing popularity proves. As it is sold only in bottles, and is to be had universally, the means of avoiding or checking these most terrible diseases are within the reach of all.
